SERVICE BRIEF

*Soil Gas Vapor
Environmental Services*

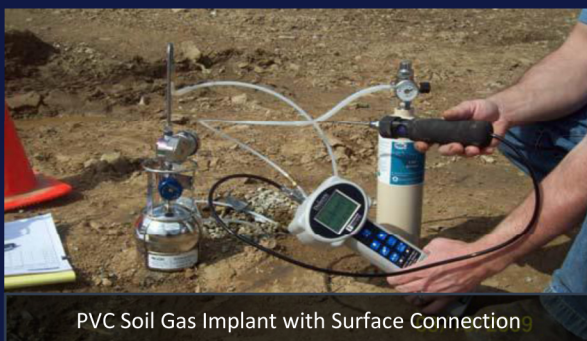

Soil Gas Vapor

EnviroProbe is a woman-owned small business headquartered in Nitro, West Virginia. Our experienced operators have provided direct-push, environmental and geotechnical drilling services since 1995. Our experienced operators have provided direct-push, environmental and geotechnical drilling services since 1995. EnviroProbe's operating region varies depending on the scope of work, but typically includes Kentucky, Maryland, Ohio, North Carolina, South Carolina, Virginia Pennsylvania, and West Virginia. We operate three track-mounted Geoprobe® rigs (Model 7720DT, 7822DT and 3230DT), one track-mounted CME-45C, one track-mounted CME-55, and a truck-mounted Mobile™ rotary rig.

EnviroProbe personnel have developed the sampling plans and performed the soil gas sampling and vapor intrusion studies for LUST and VRRRA sites. Our experience in both the development of the plans and the actual installation and sampling of the vapor points in various geologic conditions allows for advanced preparation and understanding of issues that inevitably arise with soil gas sampling.

**Track Mounted Geoprobe® Models 3230DT,
7822DT & 7720DT!!**

- EPA reference test method TO-15 (VOCs)
- Evacuated summa canisters
- Helium leak detection
- Vacuum purging
- Stainless steel implants or PVC vapor points
- ¼-inch Teflon™ tubing
- Nested vapor points for vertical profiling
- Paired vapor points (i.e., shallow, deep)
- 10-minute, 30-minute, 1-hour, 2-hour, 8- hour, and 24-hour sampling
- Operators are 40 Hour OSHA Trained
- Respirator and SCBA Fit-For-Duty Operators
